SKILLS

- Data Analytics
- Tableau
- Power Bi
- Vector CANalyzer
- MATLAB SIMULINK
- Problem Solving
- Warranty Claim Analysis
- Polyspace
- Unit Testing
- C Programming
- Python
- MS Office
- JIRA
- Requirements analysis
- Test automation
- Root-cause analysis
- Body and Chassis Technology
- Vehicle Network
- Coordination
- Data Visualization
- Manual Testing
- Autosar

EDUCATION

Bachelor of Computer Applications
IGNOU, 2025 - 2028

Diploma in Electronics Engineering
GOVERNMENT POLYTECHNIC COLLEGE, 2019 - 2022

PROFILE

Associate Engineer with 2.3 years of Tata Elxsi experience in automotive testing, data analytics, and quality engineering. Skilled in data analysis, dashboard development, issue analysis, root-cause analysis, and cross-functional coordination.

WORK EXPERIENCE

QUALITY ENGINEER, TATA ELXSI, TRIVANDRUM INDIA, 2024- 2025

- Analyzed vehicle quality and warranty data to identify recurring issues and support warranty cost reduction.
- Developed dashboards and analytical reports for issue detection, monitoring, and trend analysis.
- Extracted and prepared data from data-lake sources to generate actionable insights.
- Presented findings and recommendations to management and engineering teams.

DATA ANALYST, TATA ELXSI, TRIVANDRUM INDIA, 2023, 2024

- Analyzed chassis and motion-control system issues using DTC snapshot data and root-cause analysis.
- Extracted, cleaned, and analyzed data to identify trends and recurring technical issues.
- Developed Tableau dashboards for issue monitoring, analysis, and reporting.
- Performed requirement analysis and collaborated with cross-functional teams on problem resolution.

TEST ENGINEER, TATA ELXSI, TRIVANDRUM INDIA, 2022, 2023

- Performed unit and integration testing of automotive software across base and high variants.
- Developed test cases and analyzed defects, test results, and software issues.
- Used Polyspace for static analysis and coverage reporting, with hands-on exposure to CAN and ECU testing.
- Worked with MATLAB, UDS, Renesas Flash Programmer, Multi, and Watermelon for automotive testing activities.

CERTIFICATE AND TRAINING

- Training in C Programming, UDS Protocol, and MATLAB
- Practical exposure to CAN communication and ECU testing environments
